

Next Meeting - Sunday night, April 14, 7 to 9 pm at the Waikiki-Mapahulu Library. We will give a review of Williamson's Other Tongues, Other Flesh. There will be some illustrated material and a summary of latest information on space travel.

TELEVISION - Also next Sunday evening, at 5:45 pm, we have been invited to appear on the Star-Bulletin's Facts in Focus program, KBMB-TV, to give a Saucer Researcher's analysis of the Fireball destruction of aircraft.

HAPPY HUNTING - We had an opportunity to discuss UFOs with a Navy captain the other day, in fact he is reading some of our books. He spoke of having seen UFOs on radar screens during a recent tour of duty at Pensacola, and of seeing these same UFOs disappear at tremendous speeds when Navy jets were sent up to investigate.

"Would you say the UFOs performance indicated intelligent, controlled flight, Captain?"

"Of course it did!" he replied.

Then we mentioned the tragic Magsaysay crash in the Philippines and the possibility of UFO activity there.

"Why would anyone want to do such a senseless deed as that?"

"Captain," we replied, "Did you ever do any hunting and fishing?"

"Lots of times. I enjoy hunting; it's a great sport."

"Well hasn't it ever occurred to you that some of the Flying Saucers operating in the earth's atmosphere may be manned by Beings who are as contemptuous of us and our life as you are of the lives of the rabbit and deer and ducks you have shot and killed in your years of hunting?"

The Captain's jaw dropped. He scratched his cheek thoughtfully. A far away look came into his eyes; and he walked away from me without a word.

MELANCHOLY MARCH - I have selected eight choice news items, chosen because I believe they reveal UFO activity. The fact is that 116 people are gone, 33 of them dead for sure; and the other 83, who knows where they are or what has been done with them? Much as I dislike the Shaver Mystery with all its disagreeable implications - is it the only answer to the ghostly silence?

MARCH 12 - An Air Force KB-50 tanker with a crew of eight disappears on a flight between Japan and Wake Island. No radio signals, no debris.

MARCH 16 - A Navy J61 Invader carrying a crew of five disappears on a flight from Japan to Okinawa. No radio signals, no debris.

MARCH 18 - A civilian plane carrying two disappears over eastern Quebec. RCAF and USAF planes covered over 31,500 square miles in a fruitless search to locate it.

MARCH 22 - A U.S. Military Air Transport Service plane with 67 aboard, 200 miles away from a landing at Tokyo, disappears. Last word from the pilot was that the C-97 was okay. No further radio messages, no debris on the ocean.

MARCH 29 - An F-86F Sabrejet disappeared off Misawa AFB, Honshu, Japan. An Air Force spokesman said it "plunged into the sea in the early evening," but no trace of plane or pilot was found.

9

FOUR YEARS AGO - In January, 1953 at one of the Mark Probert Seances in San Diego, the senior member of the control group, the Yada Di Shi'ite, was drawn into a discussion of the disappearances, saying, "This carrying-off has been going on for ages. . . . These are Space Beings - Etheric Beings. They may appear on any body - in any body. They can appear in your world and take things. They have taken droves of people from your planet. Individuals, parties, crews and passengers of ships - mysterious disappearances. Many - many."

Meade Layne, head of Borderland Sciences Research Group in San Diego, asked, "What is the purpose of such abductions?"

The Yada replied, "Forgive me. At this time I cannot talk of this."

DR. WILLIAMSON - In his book *Other Tongues, Other Flesh*, does talk of this at length.

He shows that some of the "abductions" are of Space Beings who have been landed on earth to carry out certain missions; when these are fulfilled they are picked up. He speaks at length of certain of the Biblical prophets who were caught up in a whirlwind. To get the full picture of this you must read the chapters on *The Wanderers, The Prophets, and The Harvesters* in his book. That is the good side of the picture about which Meade Layne has also done so much excellent work with stories of the Guardians, the Space Beings who guide and protect us. That protection isn't perfect, though. It can't be if we are to grow up. We must face the consequences of our own misbehavior and learn to accept some responsibility for the evil WE have released in the world.

MARCH AGAIN - Speaking of evil, how about the Fireball destruction of certain planes and certain important people? There seems to be at least two types of Fireball, the missile type which is guided into a collision course with airplanes, and the hidden aerial mine type which materializes and explodes on contact with an airplane, or merely materializes enough to cause a shattering collision.

MARCH 2 - A B-25 transport crashed and burned 13 miles south of Ottawa last night, killing Canadian Air Vice Marshall R.C. Ripley and seven airmen. . . Residents in the vicinity of the crash told Air Force investigators they were startled by a brilliant flash that lighted up the sky, followed by a thunderous explosion, then an earth-shaking thud.

MARCH 9 - A fiery object hurtled toward a Pan American Airways plane tonight high over the Atlantic ocean, forcing the pilot to take evasive action to avoid being hit. Van Winkle said his first impression of the object was that it was a jet plane, until it got closer; then he saw it was "burning greenish round object, unrecognizable but definitely not a meteor." He zoomed his plane 1500 ft. upward to avoid collision and injured three passengers and a stewardess in doing so. Seven other aircraft in the area also reported seeing the mysterious object.

We have a former Air Force pilot here in Honolulu who tells of an attempt to ram his plane during a flight over the Hump, between India and Tibet, during World War II. He successfully evaded the Fireball, too, or he wouldn't be here to tell us about it! The pilot of Magsaysay's plane wasn't so successful.

MARCH 17 - Philippine President Ramon Magsaysay and 24 other persons were killed today in the flaming crash of the presidential C-47 airliner on a mountain on Cebu island. Newspaperman Nestor Mata was the only survivor. He told the *Philippines Herald*, "Your correspondent was dozing when the explosion occurred. A blinding flash was followed by the crashing of the plane in the Manunggal mountains." Investigators of the crash said there was no evidence of sabotage or an internal explosion aboard the plane.

GO BACK TWO YEARS - to Feb. 13, 1955 when a Belgian DC-6 airliner with 29 aboard was approaching Rome's Ciampino Airport. Last word from the pilot as he entered the landing pattern was that he saw a fireball near the plane. Ground observers also reported an "orange Fireball" in the sky at the time. Six days later the crashed plane was located in the Italian mountains.

MARCH 29 - A giant B-52 jet bomber exploded in a "bright ball of flame" over Skiatook, Oklahoma today, killing two of the four men aboard and blasting out half of the windows in town.

APRIL 1:- A B-25 bomber carrying eleven men "blew up" at 8,000 ft. above Dickson, Tenn. today. Only two survived.

ADD THESE STATISTICS - to the hundreds we already have in our files and we come up with what - an ugly truth that no military curtain can hide completely; our government seems to be no closer to solving this problem now than it was eight years ago when Sec'y of Defense Forrestal first ordered the cover-up. And when did hiding one's head in the sand ever solve anything? Some of us Researchers have written to Congressmen, asking that the security curtain on UFOs be lifted; but nothing has happened. Even if a more concerted effort were made and we got some Congressman to propose an investigation it would be effectively blocked by the international bankers. Did you see what happened to Congressman Wright Patman's proposal to have our elected representatives investigate the Federal Reserve System's tight money policy?

THE BANKER'S LOBBY - The factotums of finance have the most effective lobby of any pressure group in the United States, and have had since they got their National Bank Act passed during the Civil War. Since that time financial control of the United States and its resources has never passed out of their hands except for the brief bank holiday in 1933, and they soon brought Roosevelt into line. Patman felt that an investigation dominated by bankers would only endorse the tight money policy we have now. And when he proposed an Congressional investigation the banker's lobby went in to high gear. In his March 30 column, Drew Pearson said that bankers from North and South Carolina, Virginia, Georgia and Tennessee flocked through the halls of Congress, called Congressmen off the floor, and told them to vote against the Patman probe. Patman's motion was defeated. Pearson said "This means there will be no investigation of tight money at all. For Democratic leaders are so irked at the high-pressure tactics of the banker's lobby they will never put through the banker's investigation of bankers proposed by Ike."

You don't know it but the Federal Reserve System is the only private corporation in the United States which refuses to file a report of its earnings. The sad truth is that since the murder of Lincoln there has been no democracy in the United States. The bankers, controlling credit, have controlled the government. A fairly recent example of this occurred in May, 1955. The Banking Committee of the House of Representatives wanted to investigate the operations of the Federal Reserve's Open-Market Committee and ordered the Comptroller General of the U.S. to make an audit of the Reserve Banks, 12 of them, for the preceding two years. He sent word to the Chairman of the Federal Reserve Board to prepare for the government's audit. Chairman Martin's reply was to "go jump in the Potomac" or words to that effect. If an audit was ever made I didn't see hide nor hair of it in the Honolulu papers!

A GREEN LADY - instead of Little Green Men, has been causing "mass hysteria" at Wahiawa School, 20 miles north of Honolulu. Police were called in to investigate at the request of some of the parents. Five girls were consistent in their description of a green lady with seaweed hair, duck feet, scaly skin and claw-like hands. Other students weren't so sure. One fourth-grader

was sure the apparition was an older kid dressed in a Halloween costume; nevertheless a search party organized by the Wahiawa Chamber of Commerce combed the gulch back of the school - the kids had seen the Green Lady there several times during the first week in April - and found nothing.

TAKE YOUR CHOICE - In a Feb. 26 press release Dr. Lee DeForest, father of electronics, was quoted as saying, "Man is inherently an earthly creature and only his scientific imagination will ever make him a planetary immigrant." We will never even reach the moon, according to DeForest.

In a Mar. 14 press release Col P.A. Campbell, Air Force Medical Officer, said, "There is no completely insurmountable barrier to prevent man from flying out of the earth's atmosphere."

DR. WILLIAMSON AGAIN - In his letter of March 14 to me he writes, "We are now in Lima, Peru making final plans for our expedition to the unexplored territory east of the Andes mountains. We are searching for a fabulous Lost City, with thirty citadels, ancient beyond belief when the Incas first came to Peru. Many might wonder what I'm doing looking for dead and buried cities. We have some rather definite locations and are confident of success. . . . Actually the city ties in in a strange and startling way with the ~~ancient~~ ^{ancient} ~~ones~~ ^{ones} of today. . . . No, our work hasn't been stopped or interfered with; we are here in Peru to increase our work and expand all our research activities. . . . Do let me know the reactions to your review of Other Tongues, Other Flesh. I am almost cut off from news here and do appreciate hearing from friends around the world. (You can write to Dr. G.H. Williamson, c/o American Embassy, Lima, Peru.) I hope to have two new books out soon, Road in the Sky, and Secret Places of the Lion. . . ."

CITIZENSHIP - Remember Wendell Wilkie's "One World" philosophy of the early 1940s?

He broke free from the family-state-nation concept and came to a realization for the need of a larger, more all-embracing idea, world-citizenship. All of us are under pressure to expand to the larger view of world unity, but each must make the break-through from narrow, nationalistic concepts for himself. For me it came in 1930 while reading Spengler's "Decline of the West." The realization that America and its culture would someday come to an end, as had all other nations and cultures that preceded it, left me in a blue funk for a week. But I recovered and continued the philosophical studies which prepared me for the world-wide revolution in understanding which is now upon us. There is no stopping it. And you will either yield to the cosmic pressure and go along or resist it and be destroyed.
